

Unionville-Milliken Soccer Club

UMSC HEALTHY SNACK POLICY

1.0 PURPOSE

In light of the fact that obesity and nutrition-related diseases are on the rise in North America, the Unionville Milliken Soccer Club (“UMSC”) feel that promotion and modeling of healthy eating habits and balanced lifestyles to members of our Club can play a crucial part in this issue.

2.0 APPROACH

Whether as Players, Team Officials, Match Officials or as Supporters we all have a part to play. With the support of The OSA Club Excellence program, we are committed to helping improve the well-being of our community and in doing so have implemented a **Healthy Snack Policy** since January 2012.

3.0 POLICY

A Healthy Snack Policy empowers participants to nourish their bodies appropriately and limit ingredients that will impede performance or wellness. Children learn about healthy eating at school and need a supportive environment, both at home and in the community, to help put those lessons into action.

The UMSC will help make this happen. Community sports also provide adults with an opportunity to become role models for healthy eating. As such, the expectation is that half-time snacks, pre-game meals and post-game meals are to be healthy. Healthy foods and beverages are those that fall within Canada’s Food Guide and align with the web links below. The UMSC Healthy Snack Policy is maintained regardless of:

- Playing level (Competitive or Recreational)
- Location (Home or Away) or
- Purpose (Match, Training).

4.0 ADDITIONAL INFORMATION AND RESOURCES

For further information on providing proper nutrition and maintain a balanced lifestyle, please check the links on our website, and the OSA Resources provided.
